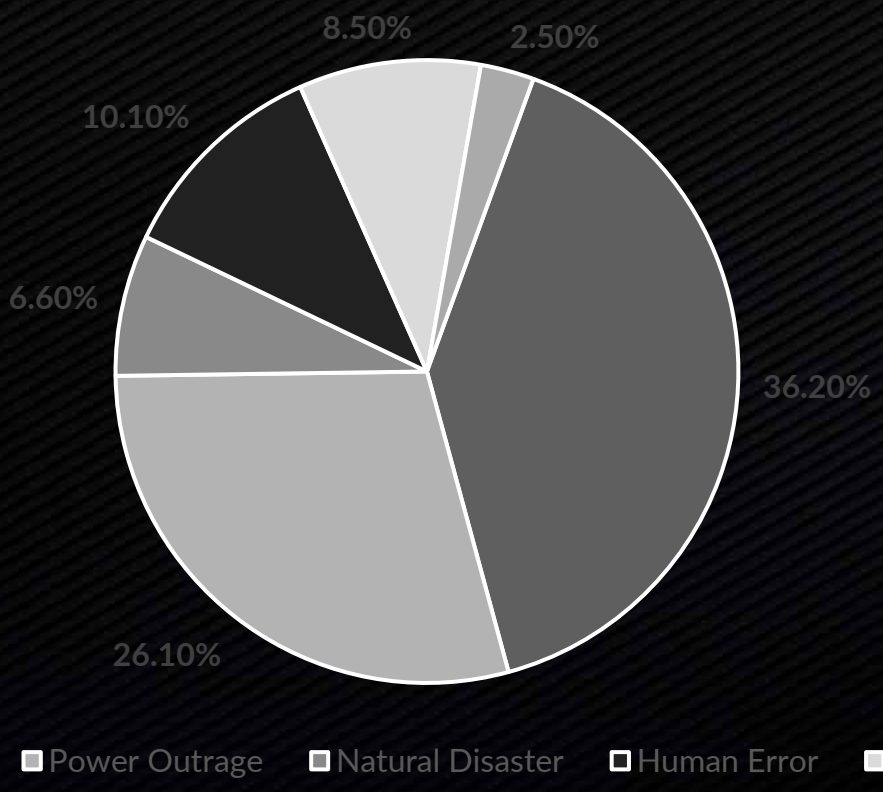
Disaster Recovery as a Service (DRaaS)

CAUSES OF DISASTER RECOVERY EVENTS



Traditional Back up and DR mechanisms are not sufficient for modern data protection.

More than 50% of DR events are tied to localized data center events (Ransomware and Power Outages)

Disaster Recovery as a Service

Garaj **Cloud Director Availability** offers simple, secure, and cost-effective onboarding, migration, and disaster recovery as a service (DRaaS) with **on-premise to cloud** & **cloud to cloud** workloads.

DRAAS FEATURES

Garaj
Cloud Platform by Jazz

THE GARAJ ADVANTAGE

Simplified Billing

Transparent, simplified billing with an option to get prices in PKR for your convenience.

24/7 Local Support

Our Business Consultants will handhold during whole lifecycle by sharing best practices & guidance along with our local Cloud Engineers who will help you in setting up your Virtual Data Center and after Sales Support.

Simplified Management

With the latest Vmware Cloud Director & Jazz Self Service Portal take full control of your cloud journey and post sales operation through easy self management Web Portal.

Managed Services Partner

We take care of your Cloud Environment so that you can focus on your core business.

Onshore Data Residency

Data is hosted locally within Pakistan to avoid the pitfalls associated of latency and compliance with offshore Data Centers.

Low Latency

Process high volume of data with minimal delay.
