

# Data Backup & Replication

Own, control, back up and replicate all your data in the cloud

### At a Glance

Garaj Backup & Replication is an enterprise grade backup, recovery and data security solution for all workloads, both on-premises and in the cloud.

Be it cloud, virtual or physical environments, Garaj Data Platform protects all of your critical workloads. You can reliably achieve any recovery time objective or recovery point objective (RTO or RPO).

### Key Features

- Instant Recovery
- Restore Anywhere
- Scale-Out with Ease
- Cloud Backup
- Encryption at rest
- Automatic Backup Scans
- Prevent Re-infection
- Application Centric Recovery
- End to end Immutability

### Product Overview

Many enterprise IT teams are not confident in their data protection strategies due to legacy backup inefficiency, unreliable recoveries and complex management across their entire datacenter.

With Garaj Data Platform Secure all your workloads with backups you can trust with end-to-end immutability. Now have centralized hybrid cloud backup and recovery with policy-based tiering of backup and archive data across all object storage classes.

As the foundation of Garaj Data Platform, Garaj Backup & Replication delivers secure, powerful and reliable data protection. Eliminate downtime with Instant Recovery option and stay safe from cyberthreats with native immutability and tested backups, all from a software-defined, hardware-agnostic solution.

### The Garaj Advantage
