

Backup for Microsoft 365

Empower Your Data Protection Strategy with Veeam's Comprehensive Backup Solution

Overview

Veeam Backup for Microsoft 365 is a powerful and efficient backup solution designed to safeguard your critical Microsoft 365 data. Whether it's Exchange Online, SharePoint Online, or OneDrive for Business, Veeam ensures that your data remains secure, accessible, and protected against accidental deletion, security threats, and compliance challenges.

Key Features

- Protect Microsoft 365 Data
- Flexible Storage Options
- Managed on Your Terms
- Self-Service Portal

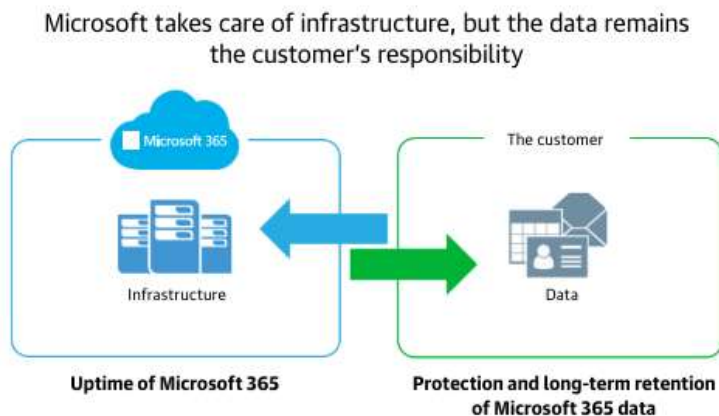

Reasons to Backup your M265 data

- Internal and external security threats.
- Accidental deletion
- Retention policy gaps and confusion
- Managing Hybrid emails deployments and migration

Product Description

The misunderstanding falls between Microsoft's perceived responsibility and the user's actual responsibility of protection and long-term retention of their Microsoft 365 data. Microsoft 365 offers geo redundancy, which is often mistaken for backup. Backup takes place when a historical copy of data is made and then stored in another location. Your infrastructure is protected but data is not. So, if data is lost, accidentally deleted or maliciously attacked, for example — you are susceptible to business loss. It's your data, you control it, and you need to protect it.

Discover the efficiency of Managed Backup as a Service (BaaS) by Garaj Cloud. Quickly deploy and protect your data with flexible storage options. Benefit from expert management while enjoying the same outstanding product performance.

The Garaj Advantage

Local Support

Managed Services

Local Availability Zone

Dedicated Account Manager
