

## GDP at a Glance [Video](#)

Garaj digital park, a hosting facility in Islamabad is ideal for clients who desire to maintain their workloads in Pakistan without compromising quality of service. Our data center is equipped to provide not only colocation, but Garaj's full suite of hosting services and solutions, including Cloud, Managed, Dedicated, and Private Cloud Hosting.

**300+**  
Racks

## Main/Data Hall

- ⚡ State of the art POD environment
- ⚡ Close coupled in-rack & in-row coolers
- ⚡ Addressable fire detection system with VESDA
- ⚡ Largest onshore tier3 TIA certified datacenter

Hot & cold containment solution

## Power

- ⚡ 3 Megawatts Capacity
- ⚡ Dedicated feeder from Wapda
- ⚡ Data Center Continuous (DCC) Generators
- ⚡ Modular power system with redundancy for AC & DC
- ⚡ Dual path power backup with failover (3 + 3 MW)

Highly vigilant VESDA & fire suppression system

## Network & Connectivity

- ⚡ Separate comm/meet-me room
- ⚡ Four Directional fiber connectivity
- ⚡ Redundant Internet Bandwidth in HA(TW1 & Pie)

Dedicated power & data routing paths

## Security & Surveillance

- ⚡ Continuous monitoring through DCIM, on site NOC and centralize NOC
- ⚡ EMS for Data Center (Temp. & Humidity Sensor, Water Leakage Sensor)
- ⚡ DCIM with dedicated NOC Room
- ⚡ Surveillance and access control system

Double conversion 99% efficient N+N Solution

## Facility/Architecture

- ⚡ Modular & scalable
- ⚡ FM-200 suppression system
- ⚡ Bus trunking system which ensures safe power connectivity and distribution
- ⚡ Compliance with IEC Standards
- ⚡ Certified operations and planning resources

Type tested switchgear system
