

TibbIT Data Sheet

JAZZ-GarajCloud

Product Summary

Overview

TibbIT is an innovative Electronic Medical Record/Electronic Health Record (EMR/EHR) software developed to streamline healthcare management by leveraging the HL7 FHIR standard. This standard ensures that TibbIT is not only interoperable with a wide range of healthcare systems and devices but also facilitates seamless integration and data exchange across the healthcare ecosystem.

The software is designed to provide a comprehensive 360-degree view of both ambulatory and hospital workflows, enhancing operational efficiency and patient care quality. TibbIT robust architecture allows healthcare providers to manage patient information, clinical data, and administrative tasks efficiently from a single, unified platform. Furthermore, its adherence to the HL7 FHIR standard means that TibbIT can effortlessly integrate with other systems, thereby minimizing the risk of data discrepancies and enhancing clinical decision-making processes.

Platform

- TibbIT is a cloud-based solution, built on the robust HL7 FHIR standard, ensuring seamless interoperability and real-time data access across multiple platforms and devices. This flexible platform simplifies healthcare management by enabling secure, scalable, and accessible solutions from anywhere, at any time.

Product Innovation

- Leveraging cutting-edge technology, TibbIT revolutionizes patient data management by integrating clinical, administrative, and operational workflows into a single interface. It continually adapts to advances in healthcare technology, ensuring future-ready performance and scalability.

Customer Engagement

- TibbIT enhances patient-provider interactions with its comprehensive data integration, providing a more personalized and efficient healthcare experience. It also supports healthcare providers by offering tools that reduce errors and streamline patient care processes.

Strategies

Key Area	Strategy
Hospital	TibbIT optimizes hospital operations by integrating critical functions such as patient management, resource allocation, and compliance, offering real time operational insights to improve efficiency and reduce costs.
Provider / Doctor	TibbIT enhances provider efficiency by providing instant access to comprehensive patient records and clinical tools, reducing administrative burdens, and improving the quality of medical care.
Patient	TibbIT improves patient engagement by providing easy access to medical records and appointment scheduling through a user-friendly mobile application, enhancing the transparency and convenience of healthcare services.

PATIENT CENTRIC ADVANCE EHR

MODULES AND PACKAGES

Our Tibbit system is segmented into various modules that are tailored to meet the specific needs of different healthcare setups. These modules are available across four different packages: Clinic, Base Package, Advance Package, and Premium Package. Each package is designed to provide an optimal set of tools and features that scale according to the operational complexity and size of the healthcare facility. The Clinic package is suitable for smaller clinics looking for basic management systems, while the Base Package includes essential features for larger clinics. The Advance Package offers more specialized tools for hospitals with complex needs such as advanced diagnostics and patient management systems. The Premium Package encompasses our full range of features, including high-end solutions for comprehensive healthcare management.

	Clinic	Base Package	Advance Package	Premium Package
Out-Patient Department		100 / day	500 / day	1000 / day
In-Patient Department (IPD)		0	50	100
Lab Devices Integration		0	3	5
Front Desk *	Yes	Yes	Yes	Yes
Self Service (kiosk) counter for Schedule and check in (Integrated App) *	Yes	Yes	Yes	Yes
Queuemetrics (Integrated App) *	Yes	Yes	Yes	Yes
Electronic Medical Record	Yes	Yes	Yes	Yes
Emergency Care			Yes	Yes
Laboratory Information System			Yes	Yes
Radiology Information System			Yes	Yes
Cardiology Information System			Yes	Yes
Document Management System	Yes	Yes	Yes	Yes
Reporting	Yes	Yes	Yes	Yes
Admin Module	Yes	Yes	Yes	Yes
Inventory Management			Yes	Yes
Practice Management	Yes	Yes	Yes	Yes
Revenue Cycle Management	Yes	Yes	Yes	Yes
Patient Mobile Application (IOS/Android)	Optional	Basic	Advance	Premium
Product Support	8x5	8x5	8x5	8x5
User Support	12x6	12x6	12x6	24x7
Import Export and share electronic Health	Optional	Optional	Optional	yes
Record Add-on Products - Additional charge				
Picture Archiving and Communication System (PACS)				
Blood Bank Module				
Financial Accounting Module (Up-To Trial Balance)				
Payroll Module				
Multi Tenancy integration
